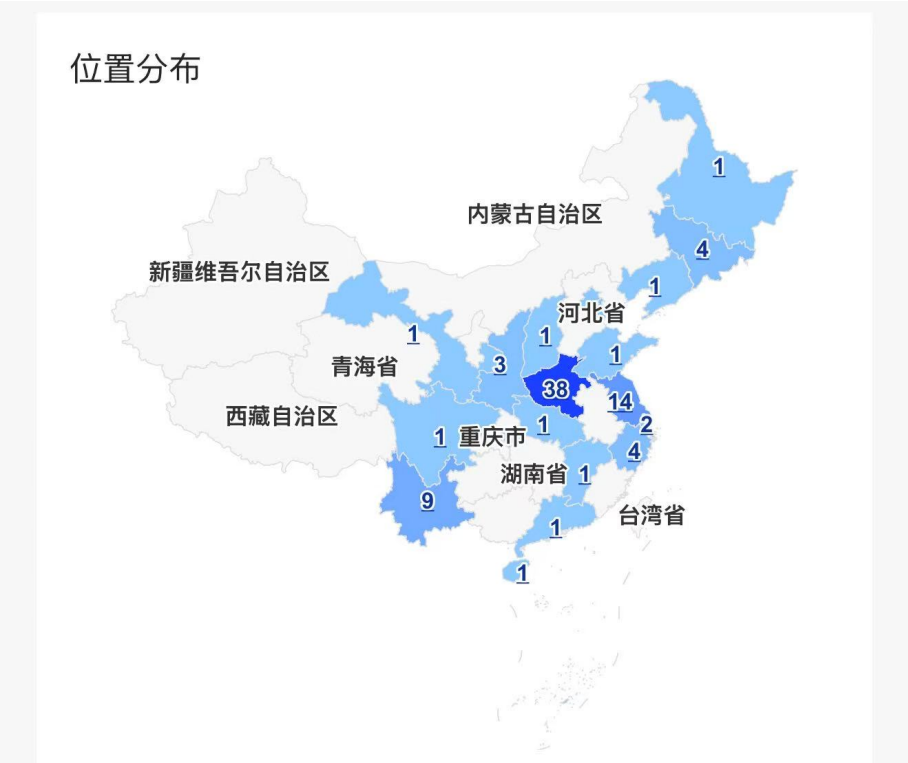
# User Persona and User Journey Map

My Stories in Museums - direct submission version



## Location Distribution

| | |
|---|---|
| **Valid responses** | 93 |
| **Core focus** | Museum storytelling and digital experience |
| **Use in portfolio** | Personas, journey map, design requirements |

The respondent sample covers multiple provinces. The highest concentrations are Jiangsu (38), Zhejiang (14), and Yunnan (9).

Survey source: “My Stories in Museums” and digital museum experience questionnaire (n = 93).

# Survey Data Overview I - Respondent Profile

## Q1. Age

| Option | Count | Share |
|---|---|---|
| Under 18 | 2 | 2.15% |
| 18-25 | 45 | 48.39% |
| 26-35 | 5 | 5.38% |
| 36-45 | 13 | 13.98% |
| 45+ | 28 | 30.11% |

## Q2. Occupation

| Option | Count | Share |
|---|---|---|
| University student | 43 | 46.24% |
| Primary/secondary/kindergarten student | 2 | 2.15% |
| Teacher / educator | 13 | 13.98% |
| Company employee | 26 | 27.96% |
| Freelancer | 2 | 2.15% |
| Retired | 5 | 5.38% |
| Other | 1 | 1.08% |
| (Blank) | 1 | 1.08% |

## Q3. Museum Visit Frequency

| Option | Count | Share |
|---|---|---|
| Rarely visit | 18 | 19.35% |
| 1-2 times / year | 54 | 58.06% |
| 3-5 times / year | 16 | 17.20% |
| 5+ times / year | 5 | 5.38% |

## Q4. Main Reasons for Visiting Museums

| Option | Count | Share |
|---|---|---|
| Experience history | 71 | 76.34% |
| Photo check-in | 15 | 16.13% |
| Relaxation | 34 | 36.56% |
| Holiday outing | 32 | 34.41% |
| Appreciate artifacts | 40 | 43.01% |
| Enjoy solitude | 7 | 7.53% |
| Other: go with friends / family | 1 | 1.08% |

# Survey Data Overview II - Existing Digital Experience

## Q5. Digital Services / New Technologies Previously Used

| Option | Count | Share |
|---|---|---|
| Official WeChat mini-program / public account | 69 | 74.19% |
| Traditional audio guide device | 38 | 40.86% |
| AR on-site interaction | 31 | 33.33% |
| VR panoramic digital museum | 22 | 23.66% |
| Location-based mini-game | 14 | 15.05% |
| Mobile audio explanation | 28 | 30.11% |
| Never used any | 3 | 3.23% |

Multiple choice; n = 93.

## Q6. Negative Experiences with Existing Museum Guidance / Digital Services

| Option | Count | Share |
|---|---|---|
| Official content is too dry / too professional | 39 | 41.94% |
| Mini-program/app is complex, slow, or AR is inaccurate | 31 | 33.33% |
| Experience feels isolated; only one-way information | 34 | 36.56% |
| Visit ends with no personal trace or story left behind | 34 | 36.56% |
| Borrowing devices is troublesome / phone guide drains battery | 24 | 25.81% |
| Guide devices malfunction / are not clean | 10 | 10.75% |
| Other | 5 | 5.38% |

Multiple choice; n = 93.

# Survey Data Overview III - Storytelling and Sharing Behavior

## Q7. Have You Shared a “Museum Story” Before?

| Option | Count | Share |
|---|---|---|
| Yes | 49 | 52.69% |
| No | 44 | 47.31% |

## Q8. Biggest Difficulties When Recording / Sharing Museum Stories

| Option | Count | Share |
|---|---|---|
| Lack background knowledge; do not know how to write interesting content | 40 | 43.01% |
| Crowded / dim environment; hard to take good photos or videos | 42 | 45.16% |
| Sorting photos and editing text takes too much time | 34 | 36.56% |
| Too little interaction after sharing | 18 | 19.35% |
| I usually do not share | 20 | 21.51% |

## Q9. Interest in Stories / Reflections / Tips Left by Other Visitors

| Option | Count | Share |
|---|---|---|
| Very interested | 21 | 22.58% |
| Quite interested | 39 | 41.94% |
| Neutral | 29 | 31.18% |
| Not interested at all | 4 | 4.30% |

**Open-response details captured in the survey**
Q4 supplement: Go with friends / family.
Q15 detail responses: Not used before, so I am not sure. / None. / No additional idea.

# Survey Data Overview IV - Expectations for Digital Interaction

## Q10. What Matters Most in a Qualified Digital Interaction?

| Option | Count | Share |
|---|---|---|
| Easy to use without learning | 55 | 59.14% |
| Smooth and not laggy | 48 | 51.61% |
| Does not disturb others | 33 | 35.48% |
| Fun and engaging | 52 | 55.91% |
| Practical and accurate information | 30 | 32.26% |

## Q11. Preferred Information Display Format

| Option | Count | Share |
|---|---|---|
| Simple text + image | 45 | 48.39% |
| Short video | 38 | 40.86% |
| 3D artifact model | 46 | 49.46% |
| Historical scene animation | 49 | 52.69% |
| Timeline / map narrative | 27 | 29.03% |

## Q12. Primary Timing / Purpose of Using Digital Interaction

| Option | Count | Share |
|---|---|---|
| Before-visit planning | 29 | 31.18% |
| During-visit real-time interpretation | 79 | 84.95% |
| Post-visit review | 31 | 33.33% |
| Online-only cloud visit | 16 | 17.20% |

## Q13. Acceptance of Online Browsing / Digital Artifacts

| Option | Count | Share |
|---|---|---|
| Strongly like; excellent innovation experience | 20 | 21.51% |
| Quite like; meets basic needs | 33 | 35.48% |
| Neutral | 29 | 31.18% |
| Do not like much; worse than offline | 9 | 9.68% |
| Strongly dislike; cannot accept online substitution | 2 | 2.15% |

# Survey Data Overview V - Playful Feature Preference and Open Suggestions

## Q14. Playful Feature Preference Ranking

| Feature | Mean |
|---|---|
| Artifacts “come alive” and talk to me (AR) | 3.59 |
| My 3D digital micro-museum | 3.49 |
| AR space-time message board | 3.37 |
| AI storytelling co-creation assistant | 3.33 |
| Overall mean | 3.45 |

## Q15. Word Cloud

**Q15. Open-ended suggestion keywords**
interaction / artifact / museum / digitalization / history / display / experience / interpretation / project / make it come alive

**Short responses**
Not used before, so I am not sure.
None.
No additional idea.

# Composite Persona A

## A Young Student Visitor

**Profile**
Age 18-25; university student; visits 1-2 times per year; smartphone and mini-program user.

## Summary

This persona represents the largest respondent group: young museum visitors who are open to digital experiences, want to understand exhibits quickly, and are willing to record or share their own museum stories when the process is easy and engaging.

## Evidence Base

| Evidence from survey | Value |
|---|---|
| Age 18-25 | 48.39% |
| University students | 46.24% |
| 1-2 visits/year | 58.06% |
| Use digital tools mainly during visit | 84.95% |
| Prefer animation / 3D / simple visual explanation | 52.69% / 49.46% / 48.39% |
| Have shared museum stories before | 52.69% |

*"I want artifacts to be explained in a more vivid way, and I want to keep my own museum story afterward."*

## Goals

- Understand key exhibits quickly during the visit
- Have a memorable and visually engaging museum experience
- Record personal impressions and share them with low effort

## Behaviors

- Uses official museum mini-programs or mobile guidance
- Prefers animation, AR, 3D, and short visual explanation to long text
- May browse and respond to stories left by other visitors

## Pain Points

- Official explanations are often dry or too professional
- Crowded / dim spaces make photos and videos hard to capture well
- Lacks confidence in writing meaningful captions or stories
- Editing and organizing content feels time-consuming

## Needs

- More vivid interpretation during the visit
- Low-friction tools for capturing feelings and highlights
- Automatic support for recap, story generation, and sharing

# Composite Persona B

## B Mature Companion Visitor

**Profile**
Age 36+; often visits with family, friends, or as part of a holiday outing; values clarity, convenience, and a smooth visit flow.

## Summary

This persona represents practical museum visitors who are open to digital support but do not want to spend time learning complicated systems. They value cultural gain, shared experience, and clear assistance over novelty for its own sake.

## Evidence Base

| Evidence from survey | Value |
|---|---|
| Age 36-45 + 45+ | 44.09% |
| Company employee / educator / retired | 47.32% |
| Visit for history / artifacts / relaxation | 76.34% / 43.01% / 36.56% |
| Value ease of use / fun / smoothness | 59.14% / 55.91% / 51.61% |
| Open-ended supplement | Go with friends / family |

*"I am willing to use digital tools, but they should help me immediately rather than create extra work."*

## Goals

- Have a smooth and meaningful visit
- Understand key content efficiently
- Use digital tools only when they clearly improve the visit
- Support a shared experience with companions or family

## Behaviors

- Uses digital tools selectively rather than intensively
- Treats digital guidance as support rather than the center of the visit
- More likely to browse others' stories than create long-form content

## Pain Points

- Apps may be slow, complex, or unreliable
- AR recognition may fail or add frustration
- Digital experiences can feel isolated and one-way
- The visit often ends without a simple recap or memory trace

## Needs

- Clear entry point and simple interface
- Brief and layered explanation options
- Companion-friendly interaction and post-visit recap

# Current-State User Journey Map

| Stage | User Goal | Typical Actions / Touchpoints | Pain Point | Design Opportunity | Emotion |
|---|---|---|---|---|---|
| **Before visit** | Decide whether to go and what to see | Search social media, museum accounts, mini-programs | Official information feels descriptive rather than engaging | Story-based previews, highlights, recommended routes | Curious |
| **Entry** | Start the visit quickly | Scan QR codes, open mini-program, find guide functions | Complex entry, slow loading, unclear first step | One-step entry and simplified onboarding | Slightly uncertain |
| **During visit** | Understand artifacts and historical context | Read labels, listen to guides, browse digital content | Dry / professional explanations and heavy text load | Simple visuals, animation, 3D and lightweight AR | Interested but fatigued |
| **Interaction** | Feel involved rather than passive | View interactive elements and other visitors' stories | Current experience is too isolated and one-way | Light social interaction and visitor story layer | More engaged |
| **Recording** | Keep personal memories and possibly share | Take photos, write captions, post content | Poor lighting, weak writing confidence, high editing effort | Auto-generated recap cards and AI-assisted story templates | Frustrated |
| **After visit** | Preserve and revisit the memory | Review saved artifacts, photos, recap pages | The experience ends with little personal trace left behind | Personal archive, digital memory page, 3D recap exhibition | Interest fades |

**Design implications grounded in the survey**

1. Prioritize real-time interpretation during the visit.
2. Make interpretation visual, simple, and emotionally engaging.
3. Support personal memory-making, not just passive viewing.
4. Reduce friction: ease of use, smoothness, and low effort are essential.
5. Add a lightweight social layer through visitor stories and shared reflections.
